

## Water-Efficient Toilet Rebate Program

The Water Efficient Toilet Rebate Program encourages customers to replace high-water use toilets to low water use toilets by providing increasing incentives for more efficient toilets. In 1992 the Federal toilet standards went into effect requiring toilets installed in new construction to use 1.6 gallons of water per flush or less. Many “older” homes and businesses still have high-water use toilets that use between 3 and 7 gallons per flush (GPF). Recent advancements have allowed toilets to use 1.28 gallons per flush or less while still providing equal or superior performance. This is 20 percent less water than the current 1.6 GPF federal standard.

### Qualifying Toilets:

Toilets being received for exchange must be 3 gallons per flush volume or greater.

Qualifying Water Efficient Toilets must:

- Have an effective flush volume of 1.28 gallons per flush or less;
- Be US EPA WaterSense Certified;
- Be Tank Type toilets, 1 or 2 pieces with complete installation components including tank, bowl, seat, wax ring, flange bolts and other necessary hardware;

### Rebates:

Toilet Gallons per Flush (GPF)		Rebate*
Existing	New	
3 GPF or greater	1.28 GPF or dual flush	\$100
1.6 GPF	1.28 GPF or dual flush	\$25

### Program Rules & Requirements:

- Complete a toilet rebate application with signature.
- Provide dated sales receipt with toilet clearly identified.
- Provide proof of decommissioning (one of the following)
  - Photo of old toilet clearly showing it has been removed and decommissioned;
  - A receipt from landfill itemizing the number of toilets disposed of;
  - If applicable, a receipt from a licensed plumbing contractor showing number of toilets removed;
- Applicant must be a District water customer.
- Rebate application must be received within 90 days of purchase.
- \*Rebate not to exceed cost of new equipment.
- Limit 3 toilets per NCSD water customer
- Rebates are available on a first come first serve basis until District’s budgeted allotment is exhausted.
